

LF3 STEEL DECK

The LF3 steel deck is a 36 in. (914.4 mm) wide composite deck and designed for use with structural concrete. It is manufactured with mechanical embossments in the webs to create mechanical and chemical bond between the deck and the concrete.

This type of steel deck is generally used in multi-story buildings.

A COST EFFECTIVE SOLUTION

- Less sheets handling on the jobsite
- Fewer connectors required to attach the sheets
- Reduced incident risks as a result of minimized jobsite handling
- Allows faster larger area coverage

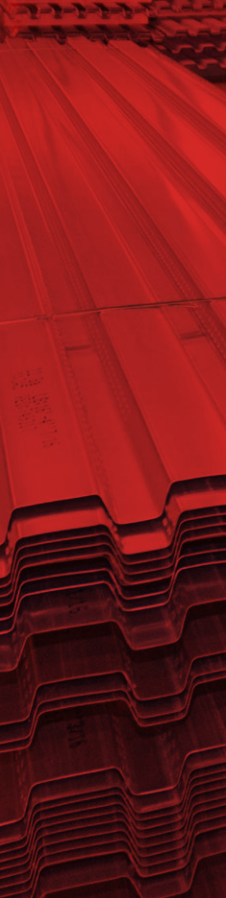

TECHNICAL INFORMATION

- Grades: 50 ksi (345 MPa) and 80 ksi (550 MPa) on demand
- Gauge: 22, 20, 18 and 16
- Width: 36 in. (914.4)*
- Finishes: ZF75 (A25), Z90 (G30), Z180 (G60), Z275 (G90)
- Vented / Hanger Tab
- UL and ULC approved

*24 in. (609.6 mm) also available on demand
